Purpose of the Candidate Guide

The purpose of this candidate guide is to provide background information on examination development as well as sample test questions similar to those on the professional examination. Though this candidate guide does not guarantee success in passing the examination, the guide does provide pertinent information that may enhance performance on the examination.

Examination Development

The development of a valid examination for counselors of problem gamblers began with a role delineation study – a clear and concise definition of the knowledge, skills, and abilities needed for competent service for counselors of problem gamblers. Using interviews, group discussions, surveys, and accepted analytical procedures, Castle Worldwide worked with a variety of experts in the field to delineate critical job components. This study was used as the basis for the questions in the examination.

What is a Role Delineation Study?

In a role delineation study, the profession is divided into major content areas (domains), which are subsequently divided into tasks. Tasks are further broken down into knowledge and skills. The Professional Examination for Counselors of Problem Gamblers is based on this delineation.

Examination Content

The 1998 Role Delineation Study identified five performance domains in the practice of counseling for problem gamblers. Candidates taking examination via the computer-based test administration will receive results immediately upon completion of the examination. A score report also will be sent to the appropriate certifying organization/board that authorized the candidate to test.

The passing point is determined by a criterion-referenced approach called the Angoff Modified Technique. Criterion-referenced examinations are quota-free with regard to passing percentages. The passing point is fixed to ensure that all candidates achieve the same score in order to be granted certification. Different versions of the examination are equated to ensure equivalent content and difficulty.

### Hand Scoring

If a candidate believes the results of his or her examination are wrong, he or she may appeal to the certifying organization/board. To initiate this process, the candidate must do so within 30 days of receipt of the score report. Castle Worldwide will hand score the examination and mail the results to the candidate for a fee of $25. Candidates should be aware that test security procedures do not permit candidates access to test questions, answer keys, or other secure materials at any time.
